Burlington, NC 27217

Instructor Training Course

PSI-PCI training has become the hallmark of training in the professional visual inspection of compressed gas cylinders. PSI-PCI is the only training agency fully recognized by US DOT, the military services, NASA, NOAA, fire and police departments across the country, cylinder and equipment manufacturers, and, most importantly, by the US courts. There is no better way to prove that you have been trained than by showing a current PSI-PCI certificate.

DOT has changed the rules. Not only does the United States Government require all hydrostatic requalifiers to administer a visual inspection at the time of hydrostatic retest, they also require requalifiers to be properly trained. DOT has even gone so far as to require that E-12479 cylinders “must be given an annual visual inspection by properly trained, Professional Scuba Inspectors, Inc. (PSI) certified personnel.”

The demands for PSI-PCI training are growing every year and there is a growing need for dedicated instructors in specific areas to help PSI-PCI meet our increasing training demands. If you are a motivated individual with current PSI-PCI Inspector training and who already has formal instructor training, PSI-PCI is looking for you to become one of our family of Visual Cylinder Inspector Instructors. And we are not talking about only SCUBA cylinders, but all high pressure compressed gas cylinders in SCUBA, SCBA, medical and industrial service. Besides being an excellent way to promote safety in the high pressure gas cylinder industry, being a PSI-PCI Instructor is also an effective way to earn additional income in this rapidly expanding field.

PSI Instructor Training Courses are conducted annually in the Washington, DC and Seattle, WA areas as well as at other locations throughout the country. They are conducted by veteran PSI Instructor Trainers, who will provide you with the information, skills and confidence to instruct high pressure cylinder users in the professional visual inspection of SCUBA and SCBA cylinders. You will gain up-to-the-minute information on cylinder history, specifications, markings, and inspection techniques. Most importantly, you will receive extensive practical experience in the actual professional inspection of cylinders. Upon completion you will be qualified to teach both the PSI SCUBA VCI and SCBA VCI courses

Your investment of \$3000 can be amortized in less than one year and, as such, is a great value.. All you need to do is complete the form on the reverse, and send it to PSI, along with a \$500 deposit, a professional resume, three references and a paper or digital photo. The balance of the ITC fee is payable on the first day of your specific ITC. PSI-PCI instructors are a select group of highly qualified instructors. All who apply are not accepted to attend an ITC. If your application is not accepted your \$500 deposit will be refunded.

ARE YOU UP TO THE CHALLENGE?
